

DIGITALSHE PLATFORM

Your fleet, fully understood.

How many trolleys do you actually have in service? What's their age profile, service history and condition? DigitalSHE gives you a complete, living picture of every asset in your fleet, from delivery to end of life.

Total assets in service
1,247 trolleys across 8 sites

LIVE

Fleet age profile
Avg. 3.2years - 14% renewal

REVIEW

Scheduled servicing
43 units due this month

ACTION

Last inspection completed
Site 3 - fully compliant

PASSED

Shoppers don't carry coins

Cash to cards to digital wallets. Yet stores still need a £1 coin at the very first touchpoint of every shopping trip.

You don't know your fleet

How many are in service right now? Where are they? What condition are they in? Without data, you're guessing.

Fleet loss is invisible until it's costly

No visibility means no early warning. Trolleys disappear slowly and the cost accumulates in silence.

FULL LIFECYCLE. EVERY ASSET.

From first delivery to end of life.

DigitalSHE captures every stage of every trolley's journey, so you always know what you have, what it needs and when to replace it.

Delivery

Accepted, logged and assigned on arrival.

In Service

Location, usage and condition tracked in near real-time

Stocktake

Track stock across stores and regions to ensure traceability.

Inspection

Automated records, paperless and audit-ready

Servicing

Scheduled maintenance, parts history, manuals attached

End of Life

Decommissioned and replaced, planned, not reactive

FULL LIFECYCLE. EVERY ASSET.

Real hardware. Real intelligence. Zero infrastructure.

A smart NFC device connecting your fleet feeding ScanNroll Pro with live asset data, no Wi-Fi, no gateway hardware, no pause in operation making your fleet smarter, simpler and accurate.

ONE PLATFORM. TOTAL ASSET CONTROL.

Three connected products. One complete solution.

DigitalSHE is built on 27 years of retail hardware expertise. ScanNRoll Pro is the operator platform at its heart, connecting your physical fleet to a digital dashboard that gives you complete oversight, compliance and control across every asset, every site.

CORE PRODUCT

THE OPERATOR PLATFORM

ScanNRoll Pro

Asset management, content management and reporting all in one place. Track every trolley from delivery through servicing to end of life. The right data, for the right people, exactly when they need it.

- Full lifecycle tracking – delivery to end of life
- Service history, manuals and specs per asset
- Real-time reporting dashboards across all sites
- Batch actions – stocktakes and inspections from one scan

SUPPORTING

The connected hardware

SHE Smart Trolley

A NFC device that feeds ScanNRoll Pro with real-world data. No Wi-Fi. No gateway infrastructure. Fits your existing fleet.

- Retrofits to existing trolleys
- 5-year battery life
- No infrastructure required

[Explore SHE Smart Trolley >](#)

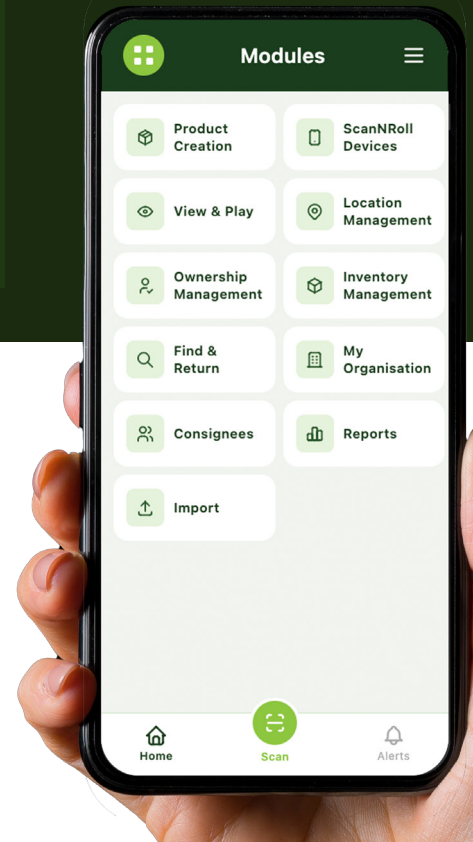

Fewer people carry cash. Coin locks belong to a different era. Retailers who remove this friction don't just improve the experience, they gain real-time visibility of every trolley in their fleet."

DIGITALSHE PHYSICAL ENGINEERING. DIGITAL INTELLIGENCE

DigitalSHE

A NFC device that feeds ScanNRoll Pro with live asset data, no Wi-Fi, no gateway infrastructure, simple, automated asset management.

- > Mobile & Desktop - Your date your way
- > Real-time fleet visibility across every site on one dashboard
- > Trolleys report themselves – automated stocktaking
- > Data-led return insights – predict loss before it escalates
- > Full service history, manuals and specs per asset

No New Infrastructure

No gateways. No store-wide infrastructure. Just the device.

On Brand

Smart device available in neutral grey or your brand colour

Integrates

Works with your existing IT systems and retailer apps. No fragmentation..
